### Issues

Tobacco harms the health, the treasury, and the spirit of Andorra. Every year, more than 52 of its people are killed by tobacco-caused disease. Still, more than 150 children (10-14 years old) and 16710 adults (15+ years old) continue to use tobacco each day. Complacency in the face of the tobacco epidemic insulates the tobacco industry in Andorra and ensures that tobacco’s death toll will grow every year. Tobacco control advocates must reach out to other communities and resources to strengthen their efforts and create change.

<table>

</thead>
<tbody>
<tr>
<td>Male</td>
<td><strong>19.56%</strong></td>
</tr>
<tr>
<td>Female</td>
<td><strong>7.11%</strong></td>
</tr>
</tbody>
</table>

Even though fewer men die from tobacco in Andorra than on average in very high-HDI countries, tobacco still kills 75 men every year, necessitating action from policymakers.

Even though fewer women die from tobacco in Andorra than on average in very high-HDI countries, tobacco still kills 25 women every year, necessitating action from policymakers.

### Societal Harms

Although economic costs of smoking in Andorra are not known, the total economic cost of smoking globally amounts to 2 trillion dollars, when adjusted for 2016 purchasing power parity (PPP). This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity due to early mortality and morbidity.

### Smokeless Tobacco
